PROFESSIONAL SUMMARY

Motivated Final Year Electronics and Communication Engineering (ECE) student with a strong focus on Full Stack Development. Proficient in HTML, CSS, JavaScript, Python, Django, and SQL. Experienced in relational database management, responsive web development, and collaborative industrial engineering projects. Dedicated to building robust, user-centric software applications.

TECHNICAL SKILLS

Languages & Web: HTML5, CSS3, JavaScript, Python,
Frameworks & DB: Django, SQL (Microsoft SQL Server, Relational DB Design)
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Genesis Workbench, Arduino IDE
Core Competencies: Database Integrity, Industrial Automation, Problem Solving, Team Collaboration

INTERNSHIP EXPERIENCE

Ashok Leyland | **Project Intern** **July 2026**

Project: Automated Transport Material Production Monitoring System

- Engineered an Automated Report Mailer utilizing Genesis Workbench and Microsoft SQL Server to streamline data flows.
- Managed relational databases and queried production operational datasets with Microsoft SQL Server.
- Generated critical production monitoring reports to boost real-time plant visibility and reduce manual overhead.
- Acquired practical industrial exposure to heavy manufacturing operations and shop-floor automation workflows.

PROJECTS

Staff Management System `SQL`

- Architected a comprehensive hospital database managing doctors, patients, staff allocations, and clinical records.
- Constructed relational schemas incorporating primary and foreign key constraints to enforce strict data integrity.
- Engineered functional modules for appointment scheduling, prescription tracking, inventory, and automated billing.
- **github.com/vigneshvicky24092005-ai/Staff-Management-SQL**

Online Assessment System `HTML · CSS · JavaScript`

- Developed an interactive, responsive web examination portal delivering dynamic multiple-choice assessments.
- Built custom countdown timers, automated real-time score calculators, and detailed outcome generation engines.
- Leveraged native DOM manipulation and optimized event listeners for smooth client-side interaction.
- **github.com/vigneshvicky24092005-ai/Quiz-App**

RFID-Based Secure Electronic Trigger Lock System `Arduino · Embedded C/C++ · RFID`

- Constructed an access control device combining an Arduino UNO, MFRC522 RFID reader, and precision servo motor.
- Engineered real-time credential validation using unique RFID UID verification for authorized entry and tamper protection.

CERTIFICATIONS

- Python Full Stack Development (QSpiders – Ongoing)
- Research Publication Certificate – IJARSCT
- Project Internship Completion – Ashok Leyland
- National Conference Paper Presentation Certificate

EDUCATION

SRM Valliammai Engineering College **2023 – 2027**
B.E. – Electronics and Communication Engineering | **CGPA: 8.293**

St. Joseph's Matric Hr. Sec. School Chengalpattu
Class XII: **85.5%** (2023) | Class X: **80.0%** (2020)

LANGUAGES

Telugu(Mother Tongue),Tamil, English,
